## PROFILE

An open-minded and down to earth individual, who can get along with people from all backgrounds and ages. Thrive on working independently but also understand the importance of team-based work and ambition. Always aim to go above and beyond of what is expected in all tasks and duties undertaken. A keen interest in technology, so would ideally like to transition into employment that involves IT, software or web development.

## SKILLS

### Technical

- Well versed in all versions of Windows, Microsoft Office and Adobe Creative Cloud
- Experienced in the implementation of HTML, CSS and JavaScript
- Familiar with React, Next.js and Tailwind
- Some exposure to Python, SQL and Vue.js

### Other

- Professional telephone manner with a good timekeeping and attendance record
- Ability to work under pressure and meet targets
- Full clean UK driving license

## EMPLOYMENT

### FreeCodeCamp – Web Development Course **Sept 2021 – Present**

To keep my skills relevant and up-to-date, I decided to do go through the free resources available on FreeCodeCamp. With the aid of patience and perseverance, I hope to become job ready upon completion and look forward to working in the vast world of development as it has always been a personal passion of mine.

### The Handy Shop – Social Media Administrator **2018 – 2019**

Using various social media outlets, namely eBay, Shpock and Facebook Marketplace, I had the chance to sell in store items online and accompany them with appropriate descriptions. Excellent customer service was also provided via the various online marketplaces and in-store too. Other duties included stock-check and creating promotional stands.

### Fox's Biscuits – Food Production Operative **2016-2017**

Working on a busy food production line within a team-based environment, I managed to pack biscuits within their relevant packaging. After a period of time, I progressed and also worked on larger robotic machines where, rather than place biscuits in packaging, they were placed in a neat order on a conveyor belt which the robotic arms then used to pick up the biscuits and place in the pertinent trays. This job role also involved managing the work area and ongoing quality checks ensuring the workplace remained risk-free and the biscuits had no defects.

## EDUCATION

### 2013-2016, **The University of Bradford**

BSc in Web Design and Technology 2:1 BSc Honours

### 2011-2013, **Kirklees College**

BTEC Extended Diploma in IT DDM

### 1999-2004, **The Mirfield Free Grammar**

9 A-C's at GCSE

## MISC.

I enjoy learning about emerging and immersive technology whether that be in the office, gaming-orientated or even that concerning automobiles. I am fairly attracted to the notion of a greener planet hence the green text as above. I also enjoy reading, sports and travelling.
